July 2020 (most recent)	https://waah.or.id/causing-agrarian-and-environmental-conflict-commitment-of-astra-agro-lestari-in-being-questioned-national-executive-waah-central-subawesi-waah-watch-tuk-indonesia/	Pasang Kayu	Astra Agro Lestari	Land dispute, burning down houses, armed resistance by Indigenous citizens. A farmer from Indonesia's Central Sulawesi province has accused PT Astra Agro Lestari, which is operating in his village, of land grabbing and for criminalizing him and his family which resulted in the farmer's imprisonment.	Indonesia	Sulawesi Barat	ADM, Bunge, Cargill, Sime Darby	<p>ADM - The determination of the claimants to a criminal case regarding the theft of fruit of their rubber palm owned by PT Mawang is in the area of our concession regions (RSP) during the investigation process in October 2017, document the National Land Agency (BPN), including the West Sulawesi Province on an area of 42 hectares claimed by villagers of Polemba Jaya, Central Sulawesi. The results proved that the area that was legally claimed was PT Mawang's HGU in Region.</p> <p>As differing views arise, the company tries to resolve them through deliberation to create consensus. However, if consensus is not met, the company submits it to a legal decision.</p> <p>Bunge - Directly engaged with Astra. Astra is open to seeking resolution via mediation</p> <p>Cargill - We have reached out to Astra Agro Lestari on the allegations and have been informed that the detention of 4 farmers is purely on the basis of criminality, namely theft of fruit (FRB) from a plantation owned by PT Mawang. An field inspection was carried out as part of the investigation process by the National Land Agency (BPN) of West Sulawesi Province. Results from this investigation revealed that an area of 42 hectares claimed by villagers of Polemba Jaya, Astra Agro Lestari also indicated that, their operations are managed in accordance with applicable laws and social regulations including operations at PT Mawang. Where grievances related to land disputes are raised, the company engages consensus. However, if the company fails to reach a mutual resolution, a complaint is filed for a legal resolution. In the case of resident named Hemi and PT Mawang, the Pasangkayu District Court ruled in favor of Astra Agro Lestari in plantations located in PT Mawang's HGU area with reference to HGU documents issued by the BPN in 1997. The decision was also strengthened by the Makassar High Court. Hemi submitted an appeal and is now awaiting the Supremacy Court's decision. Astra Agro Lestari mentioned they met with them on 11 and 12 May 2019 and an agreement had been reached that the land claimed by Agus Rambayu and several people remained part of P We will monitor the case and request for Astra to treat the case as a grievance to be updated in its public grievance log.</p> <p>Sime Darby - AAL has resolved to further strengthen the company's implementation of NDPE policy and specifically on its commitment towards Respecting Human Rights outlining certain action items found here: https://www.astra-ag.com/Action-Plan-1.pdf</p> <p>Wilmar - PT Mawang is operating legally and comply with all the regulatory framework. The company had already explored several options with the local communities in resolving the land conflict but to no avail, where the local court ruled the FRB as they claimed they are the rightful owner of the land. The FRB trial case has already been fully investigated by the local authority and the suspects have been identified for committing a criminal offence. The suspect in Pasangkayu District Court, Pasangkayu Regency, Sulawesi Barat in April 2018.</p> <p>The outcome of the investigation had also been reported by local media as follow:</p> <ol style="list-style-type: none"> http://www.beritaonline.com/2017/12/20/pasangkayu-gelar-sidang-kekasus-pertanian-helega-sawai-pi-mawang/ https://austriaindonesia.com/berita/450153/pasangkayu-mengungkap-pi-mawang-dan-sengketa-dengan-petani <p>AAL has committed to NDPE policy since 2015 (https://www.astra-ag.com/id/wp-content/uploads/2017/12/Sustainability-Policy-1.pdf), for information on Astra's journey to Sustainability, you may visit this link: https://www.astra-ag.com</p>
September 2019	Greenpeace, RAN, BRF, etc.	Multiple	FLD/A Felda Global Ventures (FGV)	Extensive labour rights abuses have been documented in FGV's Malaysian operations, including workers having to pay recruitment fees and having their passports retained by the company.	Multiple	Multiple	AAK, ADM, Bunge, Cargill, IOI, Sime Darby, Wilmar	<p>AAK - On the 12 January 2020 the company issued a letter to FGV regarding ensuring their staff receiving the compensation or the suspension or the P&C certificate for being sacked starting on the 8 August 2019, under instruction on the conducted audits on 6 different FGV units to assess the implementation of the action plan. The RSPO CP reviewed the audit reports and found the results to be unsatisfactory. The findings have led the RSPO CP to re-suspend the P&C certification of Kelang Sawai Sorting and its supply base as well as the certification process for FGV's uncertified units.</p> <p>AAK continues to support FGV's progress on the re-suspension of the P&C certification. AAK also recognises the efforts made by FGV Holdings to develop and implement its action plan taking implementation, as well as recognising efforts of AAK's tier 1 suppliers supplied by FGV Holdings (AAK does not source directly from FGV Holdings).</p> <p>AAK believes that engagement with a supplier facing labour and social issues within its supply base can sometimes be more effective than exclusion. AAK is working with the tier 1 supplier most impacted to implement a controlled parcel. Holdings non RSPO certified mills. This action encourages FGV Holdings to further progress in the implementation of its action plan, whilst sending a clear message that any unsatisfactory compliance in FGV facilities will result in the suspension of the contract. We consider that the above actions are proportionate and provide ongoing incentives for FGV, one of the major palm oil growers in Malaysia, to meet RSPO compliance requirements, as well as reducing exposure to non-compliant mills.</p> <p>ADM - In January 2020, RSPO suspended Principles and Criteria (P&C) certification processes for all uncertified units of FGV and reimposed its suspension on FGV Holding's Kelang Sawai Sorting for non-compliance of the Complaints Panel in January 2020. FGV issued a statement to clarify their position. FGV intends to appeal to the RSPO's latest decision and we will be closely following this matter. Our direct suppliers are in communication with Felda and meetings were shared with ADM to date.</p> <p>Bunge - Jan 20: Bunge is not directly connected to FGV. The developments of FGV and RSPO are closely monitored over the past months. Bunge takes note of the letter of the RSPO complaints panel including the requested milestones in the past months, we do recognize FGV's progress on some of the milestones set by the CP. FGV published a statement on their website. Bunge is seeking clarification from trade partners on their position regarding FGV, while at the same time with the Bunge team in SEA. Bunge continues to monitor the developments and progress closely and will share any further updates via our Grievance list.</p> <p>Cargill - Cargill does not buy directly from FGV, however the Company is indirectly linked to our Malaysian refinery supply chain. While Cargill significantly weighs decisions made by RSPO in our grievance process, it is not the only factor suggests gross non-compliance has been found and is not taken lightly. Cargill has been investigating RSPO's decision based published audit reports and close communication with FGV. Cargill has decided that for the time being we will not suspend FGV from our supply chain based on the information collected suppliers share the opinion that FGV is making progress and that greater transparency on RSPO's Complaints Panel decision is needed. It is understood that the audit was conducted before the CP to implement the d into account in our decision the previously planned activities undertaken since November 2019 up until 31 January 2020. These activities have been disclosed by FGV in its statement. Additionally, the audit report shared by FGV in its statement the directives perfectly. FGV has made significant progress in fulfilling the CP's directives, with a positive recommendation given by the auditors for FGV's operations in Peninsular Malaysia. For the audit on FGV's operations in Sabah, workers were identified. However, labour issues in Sabah have to be treated separately due to the external factors involving immigration regulations and processes in Sabah that may impact the sector as a whole, a fact acknowledged by the Complaints Panel directive to submit a mechanism to regularize undocumented workers which have registered with the company to be formalized.</p> <p>We also note that FGV is submitting an appeal to the RSPO Complaints Panel this week, and will be sharing an update to stakeholders next week. FGV has also completed the development of a comprehensive 5-year action plan with the involvement of local business stakeholders such as the Malaysian Rubber Processors of Malaysia (GUMAPAM) and Teraswatu.</p> <p>ADM - We take all allegations very seriously and we have reached out directly to GAR as soon as the complaint came to light. They stated that they believe they are operating legally and in accordance with Indonesian law and the requirements of the RSPO.</p> <p>ADM - Although the complaint that has been filed is new, the allegations date back to 2018, which is why GAR has issued public responses in the past. GAR intends to contest the complaint made through the RSPO Complaints Process, and will also be responding publicly on the articles that has been recently published by the Wall Street Journal. We will be closely monitoring GAR's responses and actions on this matter.</p> <p>Bunge - Bunge listed GAR on our grievance list in 2019 and closed the case in July 2019. The details can be found on page 53 of the public grievance tracker. GAR is an important palm oil supplier into NA, also to BCL/NA. The BCL sourcing and sustainability related topics such as TIP, the NDPE implementation reporting framework, supply chain related topics, sector transformation etc. We are confident that GAR is addressing these allegations in the best possible way. On top of that BCL has processes in place.</p> <p>Cargill - Cargill sources both directly and indirectly from GAR. Regarding engagement with GAR: 1. GAR has revamped socialization of its Code of Conduct through mandatory e-learning and testing in its operations, including PT Biraasari Abadi Pratama. 2. All executives have also signed an acknowledgment form to behave ethically and comply with all laws and regulations. 3. GAR has also released a public statement detailing that: <ul style="list-style-type: none"> • GAR operations are legal according to Indonesian laws. • The requirement to have HGU permits before planting is not applicable to GAR as it only applies to new plantings from 2019 • The company did not sanction the bribery </p> <p>• GAR has taken measures to reinforce compliance in the company through its socialization programs. GAR indicated they still dispute the allegations made by FPW by filing an appeal to the RSPO. We are engaging GAR to get further details on the above allegations. We are investigating this grievance in accordance with our grievance procedure and will also to Corbin. Has reached out to its own direct suppliers regarding the complaint issue.</p> <p>Sime Darby - GAR does not enter Kellogg's supply chain through Sime Darby though SD is actively engaged with GAR regarding pending issues.</p> <p>Wilmar - GAR is a supplier to Wilmar. Since the case was brought to our attention in 2018, GAR has issued several responses in its Annual Report, on its website and in this report, to transparently communicate the background, and the resolution of the case. For more info, you may refer to this latest statement: https://gldesg.com.sg/public-statement-on-new-forest-people-programme-complaint-against-gldesg-ag-resources/. RSPO has also officially registered the case on 13 March 2020, where the progress will be communicated publicly via the RSPO complaint platform - https://sd-rspo.force.com/Complaints/case/50000000020R1AAM/. At this juncture, we are following up closely with our supplier on the outcome of the RSPO investigation in order for us to deliberate our next course of action.</p>
March 2020	Forest Peoples Programme, Ek Hills Research	Various locations	Golden Agri Resources (GAR)	The complaint alleges that GAR is illegally operating oil palm plantations inside Indonesia's protected forest zone. The complaint, lodged by Forest Peoples Programme and Ek Hills Research, cites recent bribery convictions of multiple GAR officials in Central Kalimantan as evidence that the company was both aware of these land-use violations and corruptly tried to cover its tracks. According to the complaint, over 75,000 hectares of GAR's land appear to be being used for unlawful oil palm production, representing over 15% of GAR's total plantation area https://askngo.force.com/Complaints/case/50000000020R1AAM/detail	Indonesia	Central Kalimantan	ADM, AAK, Bunge, Cargill, Corbin, Wilmar	<p>ADM - We take all allegations very seriously and we have reached out directly to GAR as soon as the complaint came to light. They stated that they believe they are operating legally and in accordance with Indonesian law and the requirements of the RSPO.</p> <p>ADM - Although the complaint that has been filed is new, the allegations date back to 2018, which is why GAR has issued public responses in the past. At this juncture, we are following up closely with our supplier on the outcome of the RSPO investigation in order for us to deliberate our next course of action.</p>
May 2019	Greenpeace	PT Kahayan Agro Plantation (PT KAP)	Anglo Eastern Plantations	Between 15 February 2015 and 21 December 2017, PT KAP cleared about 2,650ha of secondary forest. Some of the cleared forest was orangutan habitat.	Indonesia	Central Kalimantan	ADM, Bunge, Cargill	<p>Bunge - One of our trade partners confirmed there will be a verification visit to verify HCV and HCS assessment conducted. Early May our trade partners monitoring system detected indications of clearing. Given the ongoing peer review process in the HCSA stopwork order until peer review process is completed. AEP responded that a memorandum was issued to the KAP operation team stating that a stop work order would be effective from May 27th onwards. AEP will furthermore publish an NDPE policy by e-Cargill. AEP has officially published their NDPE policy (July 19, 2019). AEP issued a stop work order beginning May 27, 2019 pending HCSA peer review. AEP has committed to rehabilitating these areas and will take steps to prevent future incidents. (15 April 2019)</p> <p>Bunge - Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.</p> <p>Cargill - Cargill audited a "no-buy" position to ANU in October 2016. However in the last quarter, traceability data indicated ANU's presence in our supply chain via our direct supplier PHS. PHS is only sourcing from ANU's RSPO certified oil plantations. Cargill has removed ANU from our supply chain. (May 2019)</p> <p>PHG has removed ANU from Cargill's supply chain. Cargill is supporting our direct supplier's engagement with ANU on re-engagement milestones.</p>
January 2018	Greenpeace	PT Permatia Putera Mandiri (PT PPM), PT Putera Manunggal Perkasa (PT PMP)	Austindo Nusantara Jaya	PT Austindo Nusantara Jaya Tbk (ANJ) is family owned and has a formal parent -subsidiary ownership structure, majority-owned by the Tanjung Family. Forest clearance in PT PPM and PT PMP began in late 2013 or early 2014, and satellite images show extensive deforestation by 2015. Between 3 January 2015 and 16 March 2018, PT PPM cleared 1,300ha of forest including primary forest according to the Ministry of Environment and Forestry 2015 national landcover map. Between 3 January 2015 and 20 March 2018, PT PMP cleared around 2,700ha of forest, including peatland forest within the government-determined peat protection zone.	PNG	West Papua Province	AAK, ADM, Bunge, Cargill, Corbin, IOI, United Oil	<p>Bunge - Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.</p> <p>Cargill - Cargill audited a "no-buy" position to ANU in October 2016. However in the last quarter, traceability data indicated ANU's presence in our supply chain via our direct supplier PHS. PHS is only sourcing from ANU's RSPO certified oil plantations. Cargill is supporting our direct supplier's engagement with ANU on re-engagement milestones.</p>
November 2018	RAN	Tegay Nusantara	Bengkulu Sawit Lestari	Satellite data from January to April 2019 shows that several palm oil companies have violated the government of Indonesia's moratorium on forest clearance for palm oil and the "No Deforestation" policies of snack food companies. Significant loss has occurred within the plantations of six companies: PT Nisa Yulhid, PT Putra Kurma, PT Tualang Raya, PT Indo Kumpi, PT Tegay Nusantara and the Indonesian government's own palm oil company PT Perkebunan Nusantara (PTPN) I Bidang Tualang.	Indonesia	Aceh	ADM	<p>Bunge - Nov-18: our trade partners confirmed HPG Group will undertake HCV&HCS assessment and look into legal compliance and SOP and NDPE policy. HPG Group agreed to a moratorium. We will continue to monitor our trade partner. Discussions with them to remove ANU from our supply chain. (May 2019)</p> <p>Cargill - Cargill initiated engagement with our direct supplier in February 2018 on allegations of deforestation facing PT Hardaya Inti Plantations. Following investigations and dialogue, the supplier has committed to a moratorium and ce</p>
September 2019	Greenpeace	PT Hardaya Inti Plantations (PT HPI)	Central Cipta Mardaya (Hardaya Plantations Group)	Between 26 December 2014 and 8 March 2018, PT HPI cleared 434ha of forest, including primary forest according to the Ministry of Environment and Forestry 2015 national landcover map.	Indonesia	Central Sulawesi	AAK, ADM, Bunge, Cargill, Wilmar	<p>Bunge - Nov-18: our trade partners confirmed HPG Group will undertake HCV&HCS assessment and look into legal compliance and SOP and NDPE policy. HPG Group agreed to a moratorium. We will continue to monitor our trade partner. Discussions with them to remove ANU from our supply chain. (May 2019)</p> <p>Cargill - Cargill initiated engagement with our direct supplier in February 2018 on allegations of deforestation facing PT Hardaya Inti Plantations. Following investigations and dialogue, the supplier has committed to a moratorium and ce</p>
November 2018		PT Borneo Sawit Gemilang (PT BSG), PT Sawit Mandiri Lestari	Citra Borneo Indah	In April 2018, Forest Hints, the semi-official news website of the Indonesian Ministry of Environment and Forestry, 17 accused PT Citra Borneo Indah subsidiary PT BSG of deforestation and peatland development. 19 According to Forest Hints, PT BSG began clearing and developing its concession in December 2017.	Indonesia	West Kalimantan	ADM, Cargill,	<p>Bunge - Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly.</p>
September 2019	Greenpeace	PT Gemilang Sawit Kencana (PT GSK)	Ojarum	Between 4 May 2015 and 10 April 2018, PT GSK cleared 1,100ha of peatland forest, including within the government-determined peat protection zone.	Indonesia	West Kalimantan	AAK, ADM, Bunge, Cargill, Wilmar	<p>Bunge - May-19: Our trade partner completed site visit and their review of NDPE policy. Follow up discussion HPI General management scheduled within one month. They will continue to monitor PT GSK to ensure no further HCS/HCV part of our trade partner's development programme.</p> <p>Cargill - Cargill initiated engagement with our direct supplier in February 2018 on allegations of land clearing. The company agrees to commit to NDPE. A moratorium is in place at PT Gemilang Sawit Kencana pending completion of requ</p> <p>ADM - We have been in contact with our direct suppliers and have been informed by Wilmar that they are not sourcing from Gama and related companies mentioned in the report anymore with immediate effect. Developments to be followed closely on W public briefing regarding this case on 29th of June 2018.</p>
May 2019	Greenpeace	Multiple	GAMA (formerly Gawi)	Peatland development in peatland protection zones	Indonesia	West Kalimantan	AAK, ADM, Bunge, Cargill, Corbin, IOI, Sime Darby, Wilmar	<p>Bunge - Oct-18: our trade partner informed us that GAMA group officially launched their corporate website where they also published their concession maps for stakeholders monitoring. Link can be found on the Grievance list of our trade partner.</p> <p>Cargill - The issue of indirect links between NDPE and non-NDPE companies is an ongoing area of concern for Cargill. Because there is no established approach on the issue, we believe a more thorough review is warranted. Our grievance panel is in the process when determining the applicability of the NDPE policy to indirect links between NDPE and non-NDPE companies. (May 2019)</p> <p>PHG - May-19: ME reports about new deforestation of 175ha in PT Citra Sawit. Commencing between March 7th and May 15th. Gemilang shared official letter to inform Bunge a stop work order is in place.</p>
September 2019	Greenpeace	Multiple	Genting	Settling in the subject of active RSPO complaints alleging killing of an orangutan on one of its plantations in 2017 and illegal plantation development in protection forest by three of its subsidiaries	Indonesia	AAK, ADM, Bunge, Cargill, Corbin, IOI, Wilmar	<p>Cargill - Genting also clarified that PT Permatia Sawit Mandiri does not belong to the group. Development took place in March 2017 in Sepang Group. (June 2019), Cargill engaged our direct suppliers and was informed that the land clearing took place outside will submit the assessment for peer review, pending which a stop work order is in place as of (1st May 2019).</p>	

Date Grievance Reported	Grievance Raised by:	Subject of Grievance Name (Company, Mill, Estate, etc.)	Parent Company/Group	Issue Summary	Country	Region	Direct Kellogg Supplier Link	Actions
May 2019	Greenpeace	PT Intermusa Jaya Sejahtera (PT IS)	Indonesia	Between 25 January 2015 and 28 July 2018 PT IS cleared some 5,170ha of forest, including primary forest according to the Ministry of Environment and Forestry 2015 national landcover map. The company has still not been granted a definitive State Forest Balance Letter.	PNG	Papua, Merauke District	Bunge, Cargill	Bunge - Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly. Cargill - The supplier is no longer in our supply chain as engagement via our direct supplier was un satisfactory.
March 2020	Mighty Earth	Marudi & Batu Belah concession	Sarawak	Mighty Earth has found satellite evidence that Samling is responsible for clearing more than 779 hectares of forest in Sarawak, Malaysia. Rapid Response report 24 - deforestation within the group's Marudi & Batu Belah concession in Sarawak.	Malaysia	Sarawak	Sime Darby, Lipids	Sime Darby - States that these accusations are not related to palm oil but to another commodity and therefore is not in scope.
March 2020	Mighty Earth	PT Perdana Era Agro Kencana	Muluu Sarawak	Rapid Response report 25. The company deforested 912 hectares and prepared to clear another 974 between September 2019 and February 2020. Since Mula Sawit's deforestation was first highlighted by our Rapid Response Deforestation Monitoring Program in October 2018, we have identified 1,072 hectares of deforestation and 2,577 hectares of peatland clearance within the PT Perdana Era Agro Kencana concession.	Malaysia	Borneo	Cargill - No buy moratorium in place ADM - No buy moratorium in place Lionsa - sources from ADM	
May 2019	Chain Reaction Research	PT Adisurya Cipta Lestari, PT BatuLicin Agro Sentosa, PT Jhorlin Agro Mandiri	Jhorlin Group	In 2019, Jhorlin Group cleared around 1,900 ha area of forest. Jhorlin was founded by businessman Haji Andi Syaamsudin Arsyad, commonly known as Haji Iam, a coal entrepreneur from BatuLicin, South Kalimantan. The group has a total of 12 oil palm concessions and three mills belonging to either Jhorlin Group or the wider Iam family. At least two of the companies, PT Adisurya Cipta Lestari and PT BatuLicin Agro Sentosa, appear in the supply chains of a number of traders and brands with NDPE policies.	Indonesia	Kalimantan Selatan	Wilmar	SDS Report.
February 2020	Illegal Deforestation Monitor (IDM), Mongabay	Multiple	Korindo	The Forest Stewardship Council (FSC) has chosen to impose improvement and remedy requirements on the Korindo Group (Korindo) rather than expel Korindo from the FSC scheme. This move follows an investigation of Korindo's alleged misconduct in its oil palm operations. The environmental NGO, Mighty Earth, raised a complaint against Korindo, and Korindo was then investigated by FSC under its Policy for Association (PIA). The PIA investigation concluded that Korindo had converted forests to establish oil palm plantations in Indonesia, leading to the destruction of high conservation values. The allegations that Korindo had deliberately and illegally set fires in plantations, were rejected as "the company was following the laws and regulations of Indonesian government and the explicit instructions of the licensing requirement of the Indonesian authorities in its oil palm concessions". However, these activities were considered not in full compliance with FSC PIA.	Indonesia		ADM, Bunge, Cargill	Bunge - May-18 Bunge will no longer accept oil from this supplier. We have informed our trading partners and commercial team accordingly. Cargill - Company has been suspended by our direct suppliers. Cargill adopts a no buy position on the company.
May 2019	Forcibles	PT Adai Plantation and Industry	Kuala Lumpur Kepong	In Sumatra's Riau province, another Malaysian palm company (PT APUSLE BHD) frequently affected by fires has also been sealed by the Indonesian Environmental Ministry for failing to secure its concessions from such fires.	Indonesia	Riau	AAK, Bunge, Cargill	Bunge - Jun-18: We as Bunge are no longer sourcing from this company and have informed our trading partners accordingly.
May 2019	Greenpeace	PT Sumber Alam Sejaras (PT SAJ)	NPC Resources	PT SAJ is managed (not owned) by NPC Resources. NPC Resources cleared some 1,580ha of forest April 15 SAJ between between April 2015 and 14 April 2018, including mangrove habitat and peatland forest within the government-determined peat protection zone.	Indonesia	East Kalimantan	Asat, Wilmar	Bunge - NPC's MCS-ICI report is undergoing peer review. (May 2019). Cargill initiated engagement with our direct supplier in February 2018. Moratorium is in place and monitoring is ongoing to ensure it is complied with. Assessments relating to NDPE compliance are ongoing. (May 2018)
November 2018	BAN	PT Samudera Sawit Nabati	PT Bisma Golden Powerindo or Oula-Marga	Palm oil is being grown illegally inside the nationally protected Rawa Sangkil Wildlife Reserve within the government-determined peat protection zone.	Indonesia	Aceh	Bunge, Cargill	Cargill - Cargill was alerted to deforestation allegations through BANY Watch platform of PT Last Bangko. We do not source from the concession but are impacted indirectly through Agicia's sourcing from PT MAS, which is part of the same group. Call the parent group Bisma Golden Powerindo. Agicia confirmed the decision to cease sourcing on September 19, (September 2019)
April 2018				Between 4 May 2015 and 10 April 2018, PT GSK cleared 1,100ha of peatland forest, including within the government-determined peat protection zone.	Indonesia	Kalimantan Barat	AAK, ADM, Bunge, Cargill, Corbion, ICI, Unilever	
November 2018	BAN	PT Global Sawit Semesta	Buana Garuda Mas	PT Global Sawit Semesta named on the BAN report has been found sourcing palm oil from the illegal clearing of lowland rainforests within the nationally protected Rawa Sangkil Wildlife Reserve. The mill is located immediately next to areas of illegal encroachment into the Least Ecosystem and lack the necessary procedures to trace the location where the palm oil they sell is grown, a key requirement for complying with the No Deforestation, No Peatlands, No Exploitation (NDPE) policies of all the main buying brands. Field investigations, interviews and transaction records of the broker CV Buana Indah's sales collected in early 2019, confirmed that trucks carrying the oil palm from the brokers collection point transported the oil palm fuel to the mill operated by PT Global Sawit Semesta, who supplies, or has supplied, palm oil to refineries operated by palm oil trading giants Golden Agr Resources (GAR) and Musim Mas. In the past ten years, over 3000 hectares of critical lowland forest habitat within the Rawa Sangkil Wildlife Reserve has been cleared, and a large proportion of the clearing has been for new oil palm plantations.	Indonesia	Aceh	Bunge, Cargill, Corbion	Cargill - Musim Mas and GAR completed their field verification which included site visits, interviews and document reviews. Both Musim Mas and GAR found documented evidence that PT GSS sourced from CV Buana Indah, PT Last Bangko and PT ASDALI in sourcing FFB from CV Bifer BAN's report. PT GSS is to implement its time-bound action plans to prevent future risks of sourcing FFB from areas under conservation. The action plan includes traceability to plantation and for all FFB suppliers of PT GSS to commit to sourcing only from outside of the peatling a sustainability officer to manage the T1P process. Cargill will continue engagement with our direct suppliers to ensure PT GSS is successfully implementing its action plan. We consider Leuser as a high priority landscape, and will continue to monitor or Wildlife Reserve and the wider Aceh landscape. (January 2020)
November 2018	Sawit Watch	Anugerah Energitama	Scotch Group	The report alleges violation of workers' normative rights which have started since the establishment of the operations of the Company. Both the violation of the Collective Agreement and labour rights triggered a strike of 619 workers for over five days in March. During the strike, the company never responded to the workers' demands but instead it decided to forcibly evict 412 workers along with their families, from their houses. Several episodes of violence against workers perpetrated by the company security guards and human rights violation cases have been reported, causing social unrest and conflicts. August 2019	Forcibles	PT Sime Indo Agro	Sime Darby Plantation	According to Forcibles, PT SA, a subsidiary of Sime Darby whose palm oil concession is situated in West Kalimantan province, is one of 42 concessions that have been sealed by the Ministry's law enforcement team according to the latest update. The Sime Darby concession is listed as one of the Malaysian palm oil concessions sealed due to clear evidence of forest and land fires in its concession. Based on the on-site verification report shown by the ministry, there is a signature of a representative from the Sime Darby company. This report served as the basis for the sealing carried out by the ministry as well as for subsequent law enforcement actions. Sime Darby has denied these accusations through the below statement (16 September 2019). Sime Darby has released a statement a few days earlier. With reference to a news report by Reuters entitled 'Indonesia hits back at Malaysia over forest fires' dated 13th September 2019, Sime Darby Plantation (SDP) would like to clarify that as at 4:00pm (GMT+8) today, 13 September 2019, there has not been any action taken by the Indonesian Authorities to seal off the operations of PT Sime Indo Agro (PT SA) due to fire occurrence. SDP would like to further clarify that the recent fire incident which occurred on 3 September 2019 outside of the operational area of PT SA was in fact located in lands occupied by local communities. This however had been contained and the incident was clarified to the visiting authorities from the Indonesian Ministry of Environment and Forestry (13 September 2019). Indonesian authorities have pointed out that the details of the two Malaysian giants about the law enforcement process taking place in their concessions are irrelevant, as this process will continue to the next phase anyway.
